WHY ADP?

Advanced Distributor Products (ADP) started with a vision to produce the best evaporator coils in the country. In 1992, ADP began production in Grenada, Mississippi, and started developing innovative products that are fully supported by a research and development laboratory, which includes areas for testing, assembling, and designing future products.

Today, ADP offers a wide range of premier HVAC products with exclusive design advantages. We pride ourselves on our quality, flexibility, and solutions. We design our products to fit any application and simplify installation. And we're always open to new partnerships with businesses and the communities we serve.

QUALITY

- Leading US manufacturer of evaporator coils and air handlers
- Built to the highest quality standards
- Microban® antimicrobial technology
- Advanced performance testing and simulation software

FLEXIBILITY

- Broadest product line in the industry – thousands of variations available
- Products designed to match perfectly with any system
- Personalized programs for distributor partners
- Custom product strategies to meet local needs

SOLUTIONS

- Short lead times
- Low warranty rates with simple claim process
- Insights from industry experts
- Focused on distributor and dealer success
- Quick and easy installation in the field

THE ADP ADVANTAGE

ADP unit heaters are engineered for maximum efficiency, increased reliability, and peak performance. Each unit is newly designed for simplified installation with enhanced features.

ALL UNIT HEATERS OFFER:

Maximum efficiency
and increased
reliability

Patented heat
exchanger

Simplified
installation

Power exhaust allows heaters
to be vented vertically or
horizontally

Hinged access door allows for
easy access servicing

Direct drive propeller fans
dynamically balanced for
quiet and smooth operation

Patented Tubular Heat
Exchanger provides resistance
to corrosion and oxidation

UNIT HEATER APPLICATION

Unit heaters are heating devices designed for use in various residential, commercial, and industrial settings to provide efficient and cost-effective space heating. These heaters are known for their robust construction, reliability, and ability to deliver high levels of heat output. They are commonly used in warehouses, factories, garages, workshops, retail stores, and other large open spaces where a centralized heating system may not be practical or economical.

Commercial unit heaters are a versatile solution for providing reliable and effective heating in large spaces where other heating systems may not be as practical. Choosing the right unit heater depends on factors such as the size of the area, fuel availability, energy efficiency goals, and safety considerations.

UNIT HEATER PRODUCT OFFERING

Residential and Light Commercial UHRS Series

Residential low profile unit heater great for garages and shops

Commercial UHCM Series

Commercial unit heater great for warehouses and industrial businesses

Separated Combustion UHSC Series

Separated Combustion commercial unit heater used in Automotive garages, manufacturing facilities, green house environments

STANDARD 2-YEAR PARTS WARRANTY

AVAILABLE WARRANTY ON EXTENDED COMPONENTS:

AVAILABLE 10-YEAR WARRANTY FOR ALUMINIZED HEAT EXCHANGERS

AVAILABLE 15-YEAR WARRANTY FOR STAINLESS STEEL HEAT EXCHANGERS

RESIDENTIAL & LIGHT COMMERCIAL UHRS SERIES

Scan the QR code to
learn more

Residential low profile unit heater great for garages and shops

Heating capacities from 30,000 – 105,000 BTUH

Up to 85% thermal efficiency

Power exhaust and patented aluminized heat exchanger

30% quieter than previous models providing quiet and smooth operation

Self-Diagnostic DSI Control Board improving troubleshooting and accuracy

Designed to Meet All of Your Heating Needs

1. **Dimpled Tubular Heat Exchanger**
improves efficiency and increase durability
2. **DSI Control Board**
offers many diagnostic codes to speed up installation and diagnostics
3. **Removable Thermostat and Power Connections**
for speed of installation
4. **Flame Rollout Switches**
improve safety
5. **Flame Sensor**
6. **Burner Cluster**
7. **Gas Manifold**
8. **24 V Transformer**
9. **Direct Spark Igniter**
improves operation and efficiency
10. **Pressure Switch**
verifies flue pipe is clear for safe operation
11. **24 V Gas Valve**
with 100% safety shut off
12. **Primary Limit Switch**
13. **Combustion Air Inducer**
14. **Gas Inlet**
15. **Flue Outlet**
16. **Field Power Connection**
17. **Fan Motor**
18. **Capacitor**

Nomenclature

UH	RS	45	N	A	1
Series	Configuration	Nominal Input	Fuel Type	Heat Exchanger	Design Revision
UH: Unit Heater	RS: Residential/ Low profile	30 = 30,000 (BTUH) 45 = 45,000 (BTUH) 60 = 60,000 (BTUH) 75 = 75,000 (BTUH) 90 = 90,000 (BTUH) 105 = 105,000 (BTUH)	N: Natural Gas P: Propane	A: Aluminized	Blank = None 1: Revision #1 etc

SEPARATED COMBUSTION - UHSC

Heating capacities from 125,000 – 400,000 BTUH

Up to 82% thermal efficiency

Power exhaust and patented heat exchanger made of aluminized or stainless steel

30% quieter than previous models providing quiet and smooth operation

Self-Diagnostic DSI Control Board improving troubleshooting and accuracy

2-Stage operation for enhanced efficiency and system cycle reduction (UHCM 250-400 models)

Designed to Meet All of Your Heating Needs

DSI Control Board designed
for easy servicing

Direct Spark Igniter improving
operation and efficiency
