Web Banner

The image shows two tan-colored unit heaters. One is a smaller model with its front panel open, revealing several horizontal heating elements. The other is a larger model, also with its front panel open, showing a similar internal structure. The heaters are set against a background of autumn leaves and a warehouse aisle.

Residential & Commercial Premier Unit Heaters

Engineered for maximum efficiency, increased reliability, and peak performance. Newly designed for simplified installation. Patented heat exchanger minimizes air resistance for even heating, reducing stress on the heat exchanger for increased durability.

CLICK HERE to find out which Unit Heater option is right for your application.

Residential Unit Heaters

Commercial Unit Heaters

All models are more than **82% efficient** and **30% quieter** than previous models.

UHRS & UHCM Premier Unit Heaters

UHCM Commercial Unit Heaters

Application & Features:

- Heating capacities from 125,000 – 400,000 BTU/H
- Up to 95% thermal efficiency.
- Stainless steel heat exchanger is available for longer and wet life.
- Heat exchangers are laboratory life-cycle tested.
- Tubular heat exchangers made of aluminum steel or stainless steel.
- Aluminum steel unit burners provide efficient trouble free operation.
- Labeled venting eliminates roof penetrations.
- Wiring junction box is located outside of unit.
- Safe direct spark system, free standing pilot light.
- Self-diagnostic board with LED display improves troubleshooting efficiency and accuracy.
- 3/8" x 1/8" heat mats are located on the top of cabinet for waterproofing and energy feedback mat.
- Power exhaust system with a modified flow reflector allows convenient vertical or horizontal venting to 25 ft. heights on wet roof.
- Direct drive propeller fans are dynamically balanced for quiet, efficient operation.
