MX Series

Blower Motor

= 3-speed PSC motor [1] = 5-speed ECM motor [2]

Size / Airflow

08 = 800 CFM

12 = 1200 CFM

16 = 1600 CFM

20 = 2000 CFM

Hot Water Coil

00 = No hot water coil

WP = Hot water coil with pump WN = Hot water coil without pump

AP = Hot water coil

with 130°F aquastat & pump

AN = Hot water coil

with 130°F aquastat & without pump

Heat Size

B = 3 row hot water coil [1] (available on 08 and 20 models)

C = 4 row hot water coil [1]

(available on 08, 12, and 16 models)

E = No heat (electric heat kits sold separately) [2]

2 = 208/240 V, 60 Hz, 1 ph., with time delay [2]

4 = 120 V, 60 Hz, 1 ph., with time delay [1]

Line Voltage Connection

N = Stripped wires

- [1] Hot water heat models only available with 120V 3-speed PSC motor
- [2] Electric heat & No heat models only available with 208/240V 5-speed ECM motor

Approved in state of Massachusetts

WARNING

To install the MX Series air handler in the horizontal position a (2") clearance must be maintained between the apex of the evaporator coil and the top of the coil's cabinet. Therefore, the ADP multi-position evaporator coils below cannot be used in horizontal applications with the MX Series air handler.

Slab numbers A07, A15, E27, E37, E48, E50, E55, E57, E87, and E88.

Product improvement is a continuous process at Advanced Distributor Products. Therefore, product specifications are subject to change without notice and without obligation on our part. Please contact your ADP representative or distributor to verify details. © by Advanced Distributor Products. All rights reserved.

Standard Features All Models

- Easy Installation: "One-Man-Job"
- Cabinet lined with high quality 5/8" foil faced insulation.
- Available from factory as upflow, downflow, and horizontal.
- Only four screws to remove blower panel, making it easier to service.
- Embossed cabinet in heavy gauge galvanized steel to prevent corrosion.
- Factory installed fan time delay postpones blower shutoff 30 seconds in heating mode and 45 seconds in cooling mode.
- Electrical connections can be made on top or right side for 8,12,& 16 size models and top or left side for 20 size models.
- Dynamically balanced 3-speed PSC or 5-speed ECM motor with easy to adjust settings for fine tuning customer comfort.
- Approved for installation in manufactured housing and mobile homes.

Standard Features with Electric Heat

- Slide-out panel with one-point electrical connections.
- Electric heat kits with plug in connections available for field installation.

Standard Features with Hot Water Heat

- Suitable for potable water systems.
- Enhanced grommets secure & tight.
- Easy to replace hot water coil. Remove one screw and slide out.
- Optional factory installed circulating pump fully encased in cabinet.
- . Purge valve on hot water coil allows for manual release of any air trapped in coil during installation or servicing.
- Water connections 7/8" ODF (for 3/4" water pipe) on 08 & 12 models and 1 1/8" ODF (for 1" water pipe) on 16 & 20 models.
- Multi-function control board comes standard factory installed and includes the following features:

Features are compatible with both factory and field installed circulating pumps.

- 1. Pump timer- Activates pump for 1 minute every 6 hours eliminating stagnant water in hot water coil.
- 2. 24 VAC isolation valve control-allows for zoning control.
- 3. Auxiliary contacts for water heater or boiler activation.
- 4. Freeze protection- standard factory installed, activates at 40 deg. F and deactivates at 70 deg. F.
- 5. Thermostat connections
- 6. Time delay for blower activation:
 - 60 seconds (tap in OFF position)
 - 130 deg. F Aquastat (tap in ON position)
 - Note: Aquastat tap only included if ordered

Speeds marked in **bold with an asterisk*** are the factory speed settings for both heating and cooling.

All data is given while air handler is operating with a dry DX coil and air filter installed.

These are nominal values and blower performance can vary higher or lower from these values based on the evaporator coil that is used. Hot water heat airflow performance data includes associated air pressure drop across a 4 row hot water coil for Unit Size 08, 12, & 16; air pressure drop across a 3 row hot water coil for Unit Size 20.

5-speed ECM motor in 240 V (Electric Heat & No Heat)

All capacities are based on 70°F entering air temperature.
For entering air temperatures other than 70°F use the following capacity correction factors:

 $(72^{\circ}F \times .982), (68^{\circ}F \times 1.02), (66^{\circ}F \times 1.04).$ Glycol correction factors: (10% X .98), (20% X .95), (30% X .92), (40% X .88)

Sample Hydronic System Design

Includes: Heating coil selection, line sizing and selected pump other than supplied by ADP

Sample Application

3 ton Cooling Load 180° F Water Temp 40% Glycol Mixture 80,000 BTUH Heat Required

(1) From the Heating Capacity Tables select the Air Handler that supplies at least 80,000 BTUH at 1,200 CFM, 180° F water temperature.

The Unit Size 12 hot water coil supplies 94,000 BTUH @ 5 GPM, 6.3' pressure drop 94,000 Correct capacity for 40% glycol (correction factors found below capacity chart) 0.88 Corrected coil heating capacity (BTUH) = 82,720

(2) Determine total equivalent line length

Note: Use the following line sizes as a guide for initial selection 1 - 3 GPM, 3/4" 4 - 5 GPM, 1" 6 - 8 GPM, 1 1/4"

| Line size 1" Total number of fittings | Quantity | | Equiv. ft. of pipe (Table 3) | | | | |
|---------------------------------------|----------|---|------------------------------|---|------|---|------|
| 90° SR elbows | 20 | X | 2.7' | = | 54' | | 54' |
| 90° LR elbows | 0 | X | 0 | = | 0 | + | 0 |
| 45° elbows | 0 | X | 0 | = | 0 | + | 0 |
| gate valves | 2 | Χ | 1.9' | = | 3.8' | + | 3.8' |
| Total supply and return line ler | ngth | | | | | + | 186' |
| Total equivalent line length | | | | | | = | 244' |

(3) Determine total pump head required

Press. Drop/ft (Table 1) Total equivalent line length 244' 5.61 Total pressure drop through coil (found on capacity chart) Line length correction factor for 40% glycol @ 180°F (Table 2) Total pump head required

(4) Now select a pump that supplies 5 GPM with at least 13.34' head capability.

Note: If desired, recalculation can be done with another line size to vary pump requirement.

Notes:

- 1. Line lengths are based on water only. To adjust maximum line lengths for glycol, divide length by the factors shown in Table 2.
- 2. IMPORTANT: Glycol should never be used in a potable water system.
- 3. All lengths are based on closed loop systems.
- **4.** Line lengths within the shaded areas should not be used when a water heater is the source of heat. For these line lengths, excessive line temperature loss will occur and must be accounted for.
- **5.** Supply and return lines must be properly insulated to reduce temperature loss and to prevent freezing when passing through an unconditioned space.
- 6. All lengths include (12) 90° short radius elbows. To adjust for extra or fewer fittings, use the factors in Table 1.
- 7. Always use full flow ball or gate valves to minimize pressure drop.
